Top Interview Questions

Overview

This is LeetCode's official curated list of Top classic interview questions to help you land

Array and Strings

Array and String type of questions were asked in interviews frequently. You will most

Linked List

There are not a lot of difficult Linked List problems. However, these Linked List

Trees and Graphs

Tree is a special type of graphs, so the two usual techniques used to traverse a graph

Backtracking

Here are some of the best backtracking interview questions. We recommend: Word

Sorting and Searching

These problems deal with sorting or searching in a sorted structure. We

Dynamic Programming

Here are some classic Dynamic Programming interview questions. We recommend: Best

Design

These problems may require you to implement a given interface of a class, and

Math

Most of the math questions asked in interviews do not require math knowledge

Introduction

This is LeetCode's official curated list of Top classic interview questions to help you land your dream job. Our top interview questions are divided into the following series:

1. Easy Collection (/explore/interview/card/top-interview-questions-easy/)
2. Medium Collection (/explore/interview/card/top-interview-questions-medium/)
3. Hard Collection (/explore/interview/card/top-interview-questions-hard/)

to help you master Data Structure & Algorithms and improve your coding skills.

Just like any other skills, coding interview is one area where you can greatly improve with deliberate practice (https://en.wikipedia.org/wiki/Practice_(learning_method)#Deliberate_practice).

Most of the classic interview questions have multiple solution approaches. For the best practice result, we strongly advise you to go through this list at least a second time, or even better - a *third time*.

By the second attempt, you may discover some new tricks or new methods. By the third time, you should find that your code appear to be more concise compared to your first attempt. If so, congratulations!

Remember: Deliberate practice does not mean looking for answers and memorizing it. You won't go very far with that approach. The more you are able to solve a problem yourself without any reference to answers, the more you will improve.

Array and Strings

Product of Array Except Self

Spiral Matrix

4Sum II

Container With Most Water

Others

Here are some other questions that do not ...
in other categories. We recommend:

<input checked="" type="checkbox"/> Game of Life	<input checked="" type="checkbox"/> First Missing Positive
<input type="checkbox"/> Longest Consecutive Sequence	<input type="checkbox"/> Find the Duplicate Number
<input checked="" type="checkbox"/> Longest Substring with At Most ...	<input checked="" type="checkbox"/> Basic Calculator II
<input checked="" type="checkbox"/> Sliding Window Maximum	<input checked="" type="checkbox"/> Minimum Window Substring

Linked List

<input checked="" type="checkbox"/> Merge k Sorted Lists	<input checked="" type="checkbox"/> Sort List
<input checked="" type="checkbox"/> Copy List with Random Pointer	

Trees and Graphs

<input checked="" type="checkbox"/> Word Ladder	<input type="checkbox"/> Surrounded Regions
